Flavors of Hope
SIP. SAVOR. SUPPORT.

About Us

Rainbows for All Children began as a grassroots program founded by Suzy Yehl Marta in 1983. Over the next 40 years, it expanded throughout the United States and 13 other countries. Rainbow's mission is to create a community that connects children with the support they need to navigate grief and heal from loss. Rainbows for All Children trains adult facilitators to go into schools, places of worship, community centers, and more

to lead free, peer-to-peer support groups for youth experiencing grief, whether that be from death, divorce, incarceration, deportation or other loss. In their groups, children learn to process and express their feelings with other youth, recognizing that they're not alone. Programs are available for youth ages 3-25 with tailored curriculum for each age group.

Why Your Support Matters

Sponsoring Flavors of Hope is an excellent opportunity for your business to make a meaningful impact while gaining valuable exposure. By supporting this event, you'll help provide vital resources for children dealing with grief, trauma, and loss, as funds raised will go towards training new adult facilitators and expanding Rainbows' programs. Your sponsorship demonstrates a strong commitment to community well-being, youth mental health, and social responsibility.

I felt like I was the only one that was in my scenario of having divorced parents, but you know, I kind of realized, after I joined Rainbows that I'm not the only one and that there's people that have the same emotions as me.

By sponsoring Flavors of Hope, your business will be showcased on-site to a dynamic audience of men and women ages 25 - 65 from across the greater Chicagoland area. These individuals are professionals from across business sectors who have been involved with Rainbows in some capacity - as participants, board members, or donors - and/or who are moved by its mission and, like you, want to show their support. Your business will also be highlighted through Rainbow's digital marketing and social media networks.
